

Clarification on enrolling new student's and status of current students:

- Students who are currently enrolled in grades TK – 5 and grades 7 – 12 are grandfathered into the OLD California Immunization Requirements. Grades TK – 5 will catch up with the new requirements as they transition from 6th to 7th grade.
- Students currently in 6th grade, must meet the NEW immunization requirements since they will be transitioning into 7th grade. Please send your Status B letters out in a timely manner so parents have time to make appointments and meet these requirements. The new requirements must be met prior to 7th grade registration.
- Students entering at ANY grade level for the remainder of the 2018-19 school year will be registered using the NEW California Immunization Requirements.
- Students in grades TK – 5 who currently have a Personal Beliefs Exemption on file that was submitted prior to January 1, 2016, will remain a Status B through their 6th grade year. PBE's do not carry over into 7th grade and are no longer valid.
- Students in grades 8 – 12 who currently have a Personal Beliefs Exemption on file that was submitted prior to January 1, 2016, will remain a Status B through their 12 grade year. We suggest that you check CAIR to see if they have any immunizations since submitting this PBE and if so, print the CAIR immunization record and enter the dates in Aeries. This may change the status of some students from a Status B to a Status A. If their status changes to Status A, remove the "X" from "E" and the "P" or "X" after each immunization that was tagged as a Personal Belief in the "Exemption Code" field. Also, remove the date in the "Exemption Date" box. Print a new CSIR card and sign and date it. This would be a tremendous help to our graduating 12th grade students so they would have current and up to date immunization records as they continue their education.
